

Employment service organized an excursion to the enterprise for pupils of Kamianske

When choosing a professional activity, it is necessary to take into account the practical knowledge about the profession - this will enable young people to come closer to making the right decision and avoid disappointments in the future. For this purpose the employment service conducts job specification excursions to potential employers for senior pupils.

Pupils of 9th class of ELC №3 visited Spetztekhnastka LLC, where they learned about the professions that are being utilized at enterprise and the direction of its activities.

Spetztekhnastka Ltd. produces high-precision press molds for plastic injection molding, plastic automotive components, plastic packaging for food, for medical products and for paints and varnishes.

First, schoolchildren visited the instrumental production, where the special-purpose centers under the software control produce press molds, which are the basis for future plastic products. In another shop, the excursionists saw how the process of cars parts manufacturing was organized, and after that they were demonstrated the production of containers for food and paint and varnish.

At the end of the excursion, the guests were wished successful finishing the school and making a well-considered decision, when choosing a profession.
